# Remember to Feed your AI

Your AI is hungry. The more data and info you feed it as part of your prompting, the stronger it gets and the more it helps you.

Tell it about your job and project every time you prompt!

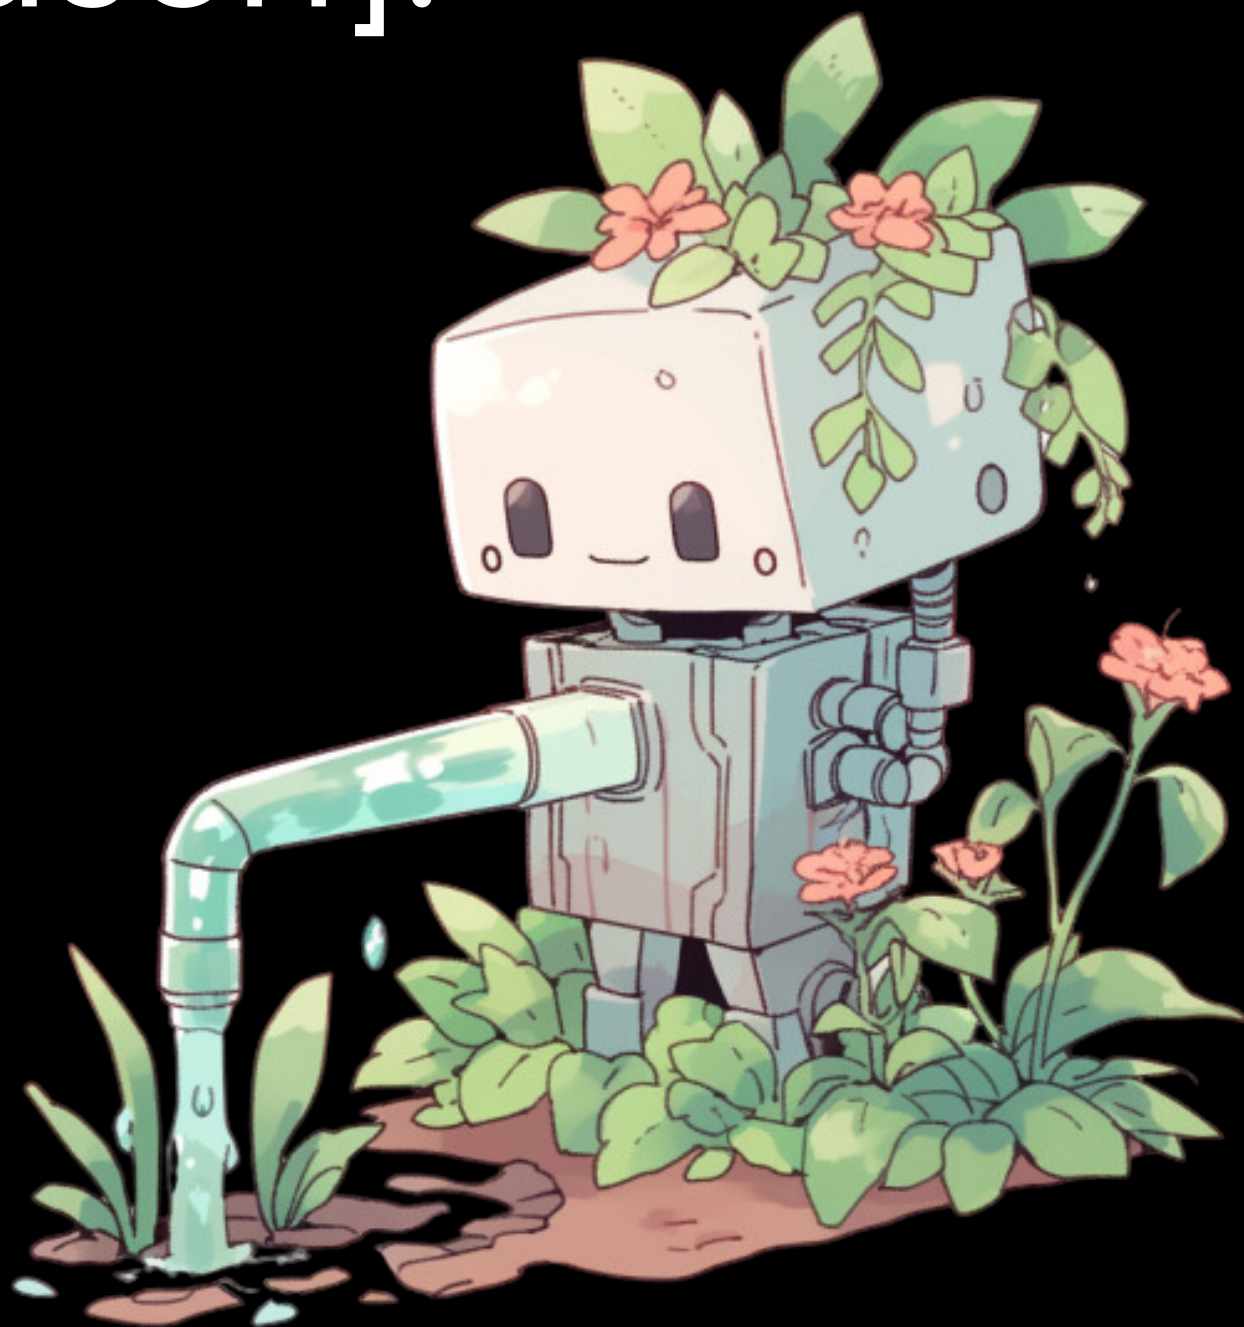

1. Planning is hard. This prompt gives farmers a daily to-do list tailored to their location and the current season, helping them to stay organized and focused without having to plan everything from scratch.

Prompt: "Provide a checklist of daily tasks for [season] in [geographic locale]."

2. Irrigation strategies are complex. This prompt provides irrigation strategies customized for a specific plant type and season, allowing farmers to optimize water usage and plant health without extensive research.

Prompt: "Suggest efficient ways to irrigate [plant] in [region] during [season]."

3. Farmers need to stay on top of crop threats. This prompt provides a list of potential threats to their crops and prevention strategies, reducing the time spent on researching and managing pests and diseases.

Prompt: "List potential pests and diseases for [plant type] in [region] and how to prevent them."

4. Crop lifecycle analysis and planning is a critical part of successful farming. This prompt provides a tailored schedule for the entire lifecycle of a crop, helping farmers to plan and manage their time efficiently.

Prompt: "Provide a schedule for planting, fertilizing, and harvesting [plant] in [region]."

5. Selling produce is an important part of farming. Farmers can receive marketing strategies tailored to their product and location, helping them to increase sales without spending a lot of time on marketing research.

Prompt: "Suggest marketing strategies for selling [product] in [geographic locale]."
