Patient resources.....	pg10
Top journals.....	pg12

# Remember to Feed your AI

Your AI is hungry. The more data and info you feed it as part of your prompting, the stronger it gets and the more it helps you.

Tell it about your job and project every time you prompt!

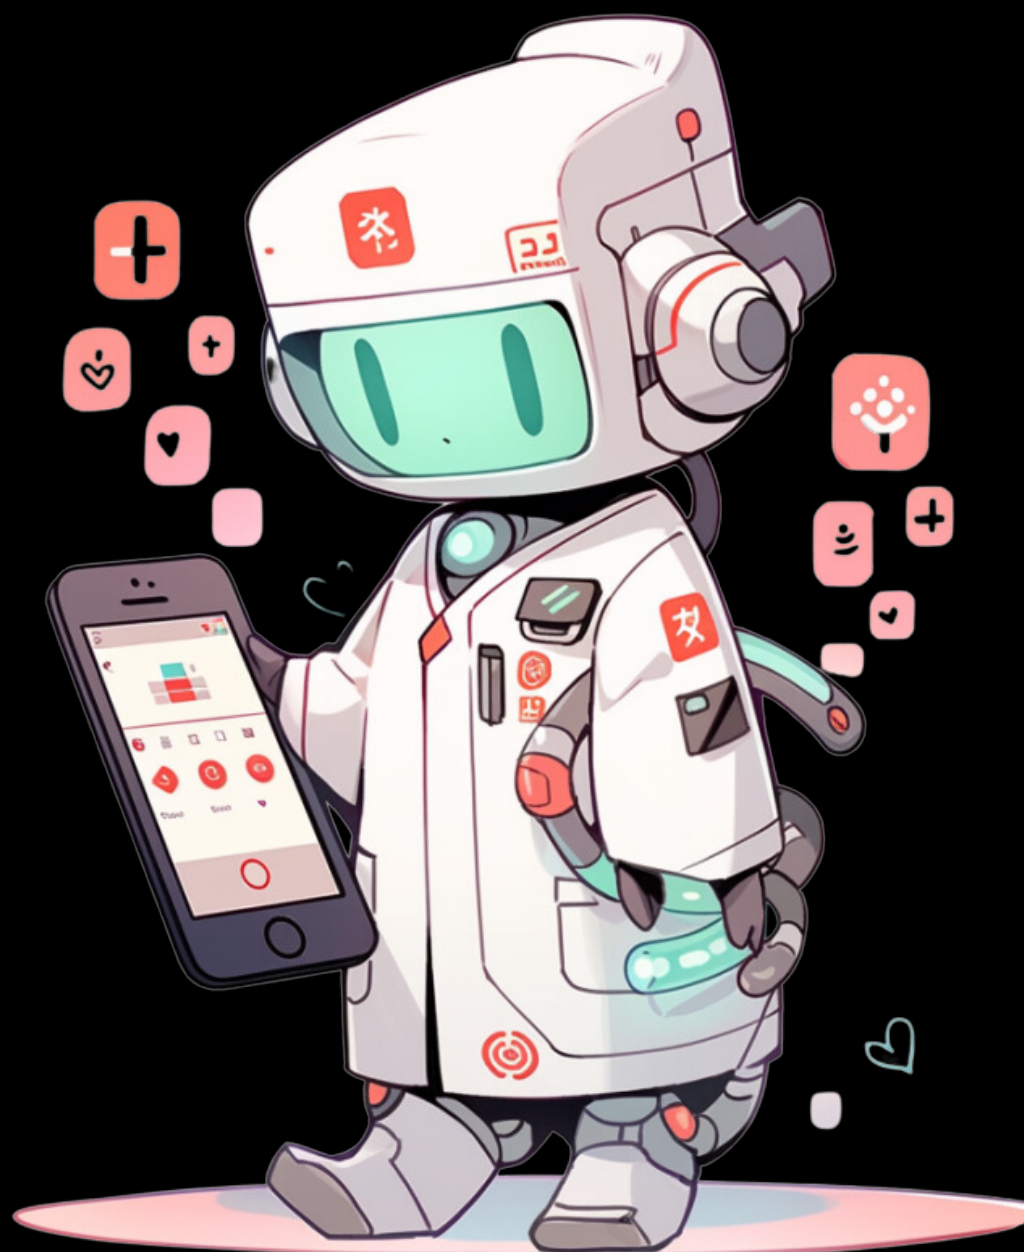

Having a well-prepared patient history form can make consultations more efficient, focusing on the patient's current issues.

Prompt: "Draft a comprehensive patient history form specifically for [type of medical specialty, e.g., 'cardiology']."

Pre-set email templates can simplify regular communications, like sharing test results with patients, saving considerable time.

Prompt: "Create an email template for sharing [type of medical test, e.g., 'blood test'] results with patients."

Planning a detailed agenda ensures meetings with staff or medical reps are efficient and to the point.

Prompt: "Generate an agenda for a team meeting focusing on [current medical issue or project, e.g., 'implementing telemedicine']."

Having a preset list of resources can speed up the process of directing patients to further care or information.

Prompt: "Compile a list of recommended resources for patients with [medical condition, e.g., 'Type 2 Diabetes']."

Knowing which articles or journals to read for updates in a specific field can save hours of sifting through irrelevant material.

Prompt: "Identify top 5 medical journals or articles for staying updated in [medical specialty, e.g., 'oncology']."

Without your  
**reposts** and  
**comments**, I  
keep getting  
nocebo  
reactions
